

## „Springboard was yesterday, the future belongs to the Booster Boards!“

The Booster Boards unite the functionality of a classical Spring Board with the dynamics, the ease and the jumping fun - factor of a trampoline.

The Booster Board models were specially designed for learning low - impact jumping exercises and are ideal for athletes of all ages and performance categories.

**Advanced**  
for high performance  
level

### ALL THE ADVANTAGES AT A GLANCE:

- Flat, barrier - free entry zone (in the Open - End model version)
- Low - impact jumping, excellent take - off dynamics
- Height adjustable
- Highest security standards due to the unique Eurotramp coverall frame and spring padding system
- Excellent stationary stability
- Easy transport due to integrated wheels
- Ideal for beginners and advanced, for all age groups
- Available as Open - End or Closed model version
- Modern design and perfect processing
- Highest quality product components
