

# ***CLEANING AIRTRACKS***

Due to the current situation, we would like to provide you with a few tips on how to clean the AirTrack. Please note that the suggested methods are not a guarantee for removing all viruses. AirTrack Factory assumes no liability for any damage that may occur.

We recommend cleaning the AirTrack with a disinfectant soap and water. It is best to use a soft cloth or an old piece of clothing. You could also use white spirit for any stubborn stains.

You can wipe the AirTrack dry with a soft cloth or let it dry overnight. Please note that the AirTrack can only be packed away dry. Do not forget that the Velcro on the AirTrack can still be damp, even if the AirTrack is already dry.
