

AIR TRACK SPARK

The AirTrack Spark is larger and thicker than any of our other AirTracks for home training: 5 x 1.4m (we recommend the OV10 for inflating the Spark). Our specially designed 20cm thick Sports Double-Wall fabric make the AirTrack Spark the best bouncing home track so far.

The 2 times larger surface makes it even more safe and versatile than any of our Home Equipment and the seam protection will ensure you get the strongest AirTrack available. You only need a spark to start your fire.

Easy on the body

Small in storage

Completely silent

Required blower: OV10

Inflation within 3 minutes

Suitable for home use

Item

AirTrack Spark 5 x 1.4 x 0.2 m
