Available in different lengths
(400 to 2000 cm)

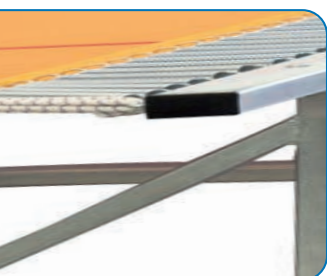

200 cm

140 cm

70 cm

Excerpt:
Jumping bed made
with PVC-coated
webbing material

**Improved
Frame /
spring construction!**

**Higher
strength!**

**Small
packed size:**
200 x 80 cm/ height of
pallet depending on length
of the track: 60 - 160 cm.

Weight:
120 - 600 kg depending on version.

ALL ADVANTAGES AT A GLANCE:

- Improved, highly stable frame construction made of square tube profiles, hot-dip galvanised.
- **Higher strength** for improved control and power while jumping.
- Frame construction with lower tolerances and high dimensional accuracy, due to its higher stiffness.
- Therefore, the trampoline is ideal for installation in pits, but can also be used as a stand-alone piece of equipment.
- Very little waste is created in production, thanks to the optimised dimensions.
